The invention refers to the food industry, in particular to a process for production of canned vegetables with meat.

The process for production of canned vegetables with meat includes preparation of the chick pea matured seeds and of the meat, mixing thereof, addition into the obtained mixture of the salt, caraway, thyme and lovage, packing into bottles, filling up with meat-broth, hermetic sealing and sterilization. The components for the production of canned vegetables are taken in the following ratio, mass %:

chick pea	43
meat	15
table salt	2
caraway	0,1
thyme	0,1
lovage	0,2
meat-broth	the rest..

The result of the invention consists in enlarging the assortment of canned vegetables with meat.
