The invention relates to the food industry, namely to the preparation of dry fruit snacks, in particular to a process for preparing dried plum bars.

The process, according to the invention, provides for grinding dried plums, mixing them with concentrated fruit juice and/or fruit syrup, or a mixture of juice and syrup with natural honey, as well as with other dried fruits and/or nuts, and/or oilseeds, extruding the mixture, slicing and drying thereof.

Optionally, the bars are covered with glaze.
