

s 2022 0013

The invention relates to fish-farming and can be used to stimulate the development of fish producers of cyprinids in ponds.

The method for pond farming of fish producers of cyprinids, according to the invention, comprises administration to fish producers in autumn and spring of food comprising cobalt chloride, at a cobalt concentration of 15-25 $\mu\text{g}/\text{kg}$ of food.

The technical result of the invention consists in increasing the fish product (viable and healthy fry) by 25%.
