

s 2022 0079

The invention relates to apiculture, namely to a process for feeding bees.

The process, according to the invention, comprises feeding the bees in the spring period with a mixture of 50% sugar syrup and 1.253.5 mL/L of a 2% aqueous solution of hexaaminocobalt(III) chloride, in the amount of 1.0 L of the mixture per bee family, every 7 days, from April to the main honey flow.

The result of the invention consists in increasing the strength of the bee families, the egg-laying of the queens, the number of hatched brood and in increasing honey production.
