

a 2002 0070

The invention relates to the metal protection from corrosion, namely to a solution for steam boiler inner surface conservation.

The solution for steam boiler inner surfaces conservation from corrosion contains, in mass %:

benzotriazole 0,02...0,04

urotropin 0,10...0,50

water the rest,

and at the benzotriazole concentration of 0,01...0,02 mass % the urotropin content constitutes 0,20...0,50 mass %.

The result consists in increasing the efficiency of metal surfaces protection from corrosion.
