

a 2002 0070

The invention relates to a solution for conservation of steam boilers' inner surfaces against corrosion and may be used for the protection of inner surfaces of the steam boilers.

The solution for conservation of steam boilers' inner surfaces against corrosion comprises, in mass %:

benzotriazole	0,01...0,04
urotropin	0,10...0,50
water	the rest.

The result consists in increasing the efficiency of protection of the metal surfaces from corrosion.
