The invention relates to the field of chemistry and medicine, particularly to a compound with hybrid terpenic and benzimidazole skeleton, which can be used in medicine as an antifungal and antibacterial drug.

According to the invention, claimed is 2-amino-1-( $\Delta^{8,9}$ -bicyclohomofarnesenoyl)-benzimidazole compound with the formula:

which has pronounced antifungal and antibacterial properties with minimum inhibitory concentration values of 0,064  $\mu\text{g/mL}$  and 0,5  $\mu\text{g/mL}$ , respectively.

Claims: 2
